

Sebastian Gallo

617-901-1051 | sebastian_gallo@brown.edu | [slollag.github.io](https://github.com/slollag)

EDUCATION

Brown University, Providence, RI

Expected: May 2027

Sc.B. Computer Science

GPA: 3.8/4.0

- **Relevant Coursework:** Operating Systems, Applied Cryptography, Logic for Systems, Foundations of AI, Discrete Structures and Probability

TECHNICAL SKILLS

Languages: C/C++, Python, Java

Tools & Technologies: Git, Databricks, Spark, SQL, Docker, GCC/GDB, Bash, Linux

Concepts: Multithreading, File Systems, Virtual Memory, Data Pipelines, Natural Language Processing

RELEVANT WORK EXPERIENCE

Data & AI Engineering Intern, Phillips 66, Houston, TX

Summer 2025

- Developed a **data product enabling natural language to SQL (NL2SQL)** queries over materials warehouse data.
- Used **Python, Spark, SQL, and Databricks** to build and optimize ETL pipelines for structured query generation.
- Collaborated with data scientists and domain experts to design a system capable of parsing and translating human-readable prompts into executable SQL queries.

Intern, Geocomp Engineering, Acton, MA

Summer 2023

- Built custom data logger devices for civil engineering field projects.
- Gained hands-on experience with electrical systems, sensor integration, and risk mitigation in real-world environments.

PROJECTS

Weenix, C

- Worked with a Unix-like operating system in C as part of Brown's Operating Systems course.
- Implemented process management, threading, device drivers, S5 file system support, and virtual memory features.
- Developed in a Linux environment using GDB, GCC, and Git.

Guitar Tablature Generator, Forge (Alloy-style logic language)

- Designed a constraint-based system to model a guitar fretboard and map valid chord shapes across strings.

ACTIVITIES/INTERESTS

Poker Club, Forecasting Club, Club Swim Team, Guitar Songwriting/Production
